S

StackPilot AI

V1.0.6 • ENTERPRISE EDITION

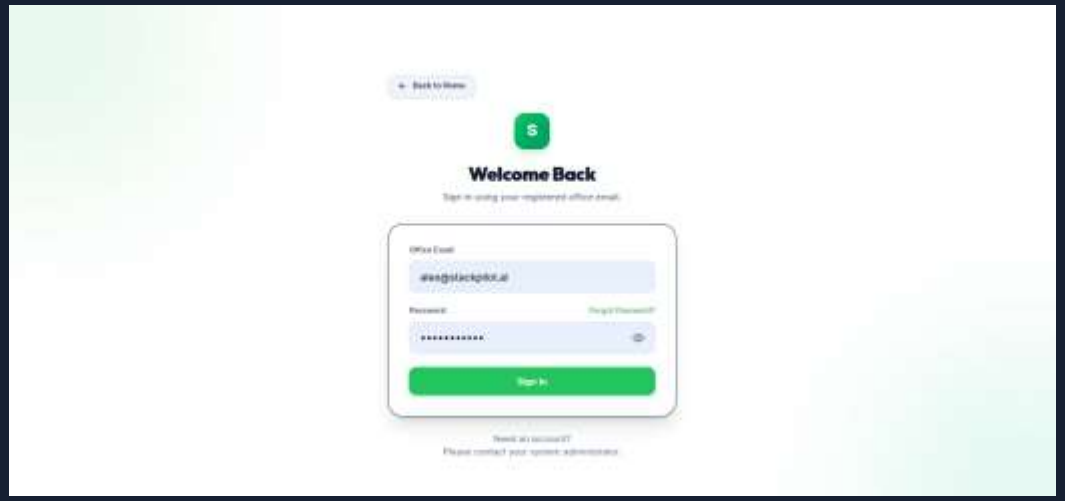

High-Performance Project Management, CRM, & Operations Hub.
Bridging executives, developers, and QA in a single workspace.

CRM | Projects | Finance | AI Studio | Reports | Admin

ACCESS CONTROL

Secure Access & RBAC

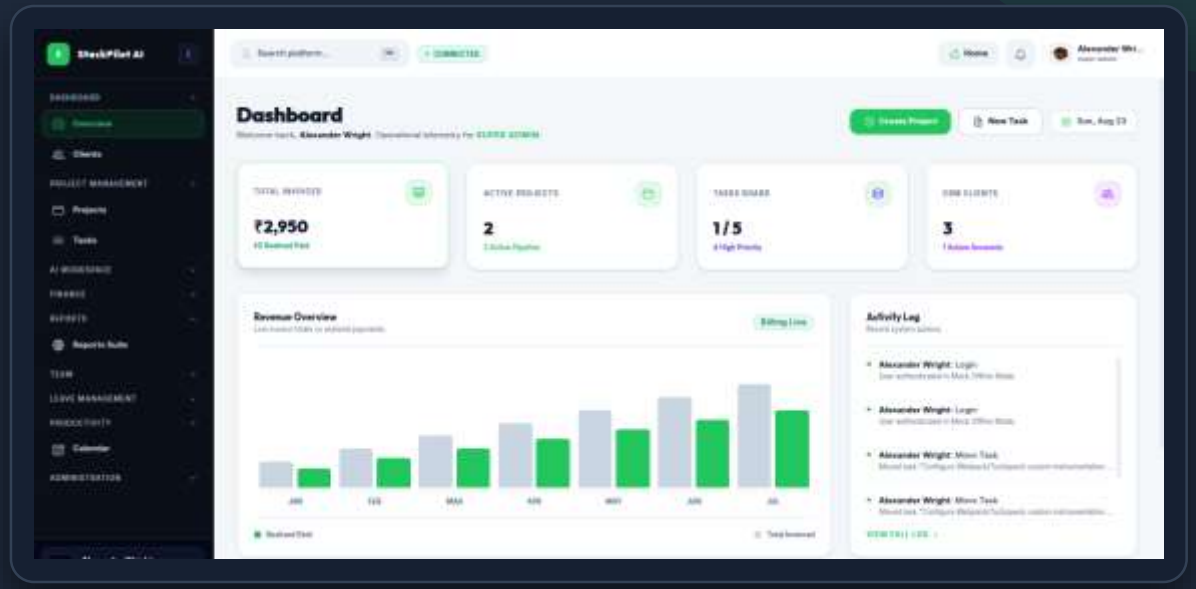

- Role-Based Access Control governs every module, tab, and action across the platform
- Enterprise-grade security with JWT authentication and CORS-hardened API endpoints
- Full audit telemetry logs every login, session, and administrative action

COMMAND CENTER

Executive Dashboard

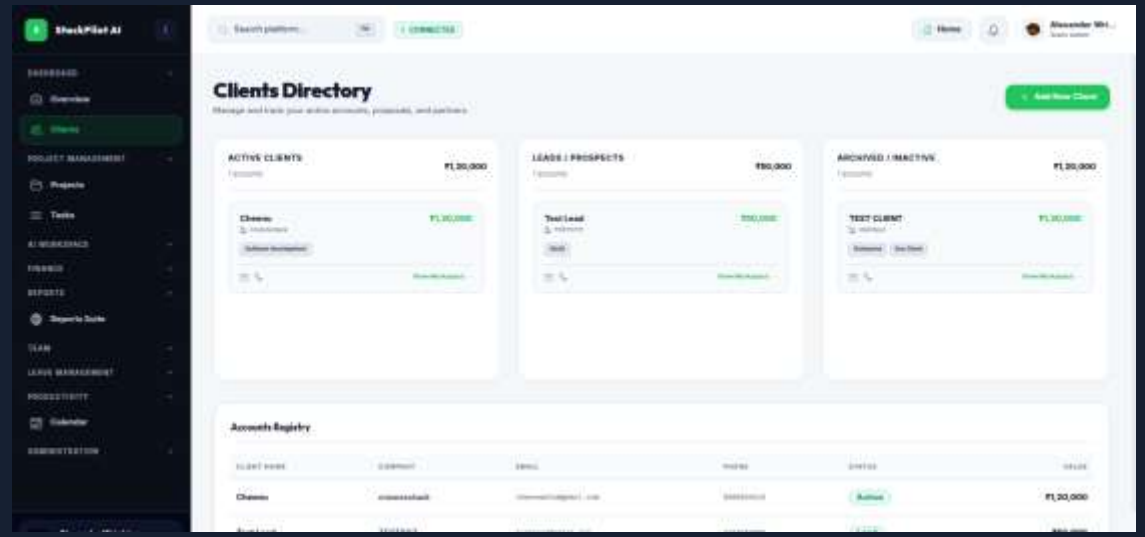

- Real-time operational overview across projects, tasks, CRM, and finance
- KPI tracking for invoicing, active projects, task velocity, and client accounts
- One-click Role Switcher lets executives preview the platform as any team role

REVENUE OPS

CRM & Client Management

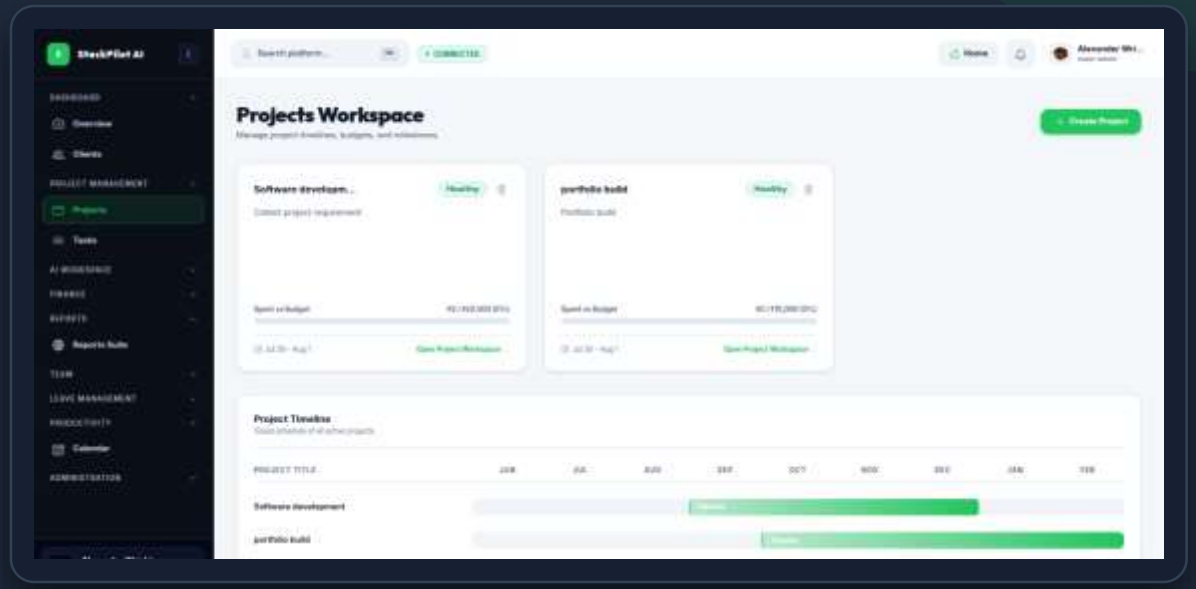

- Centralized Sales Pipeline Hub tracks every account from lead to close
- Configurable Pipeline Stages mirror your team's unique sales motion
- Unified Account Registry with contact details, status, and deal value

DELIVERY

Projects & Sprints

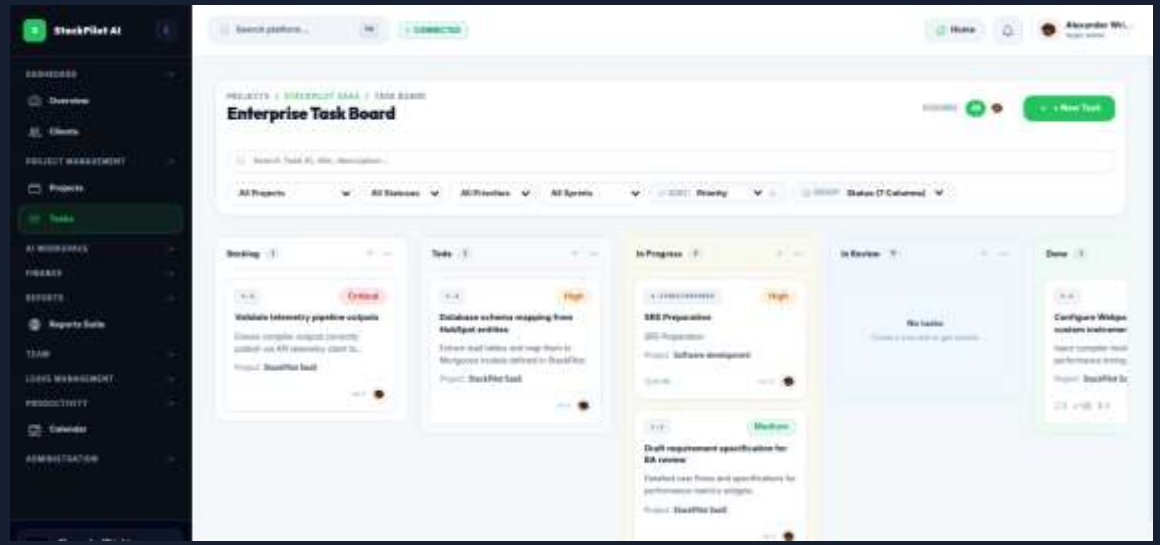

- Dedicated Workspace Tracking for every active initiative
- Live Financial Health monitoring — Spent vs Budget at a glance
- Visual Gantt Timeline keeps every project milestone on schedule

EXECUTION

Enterprise Task Board

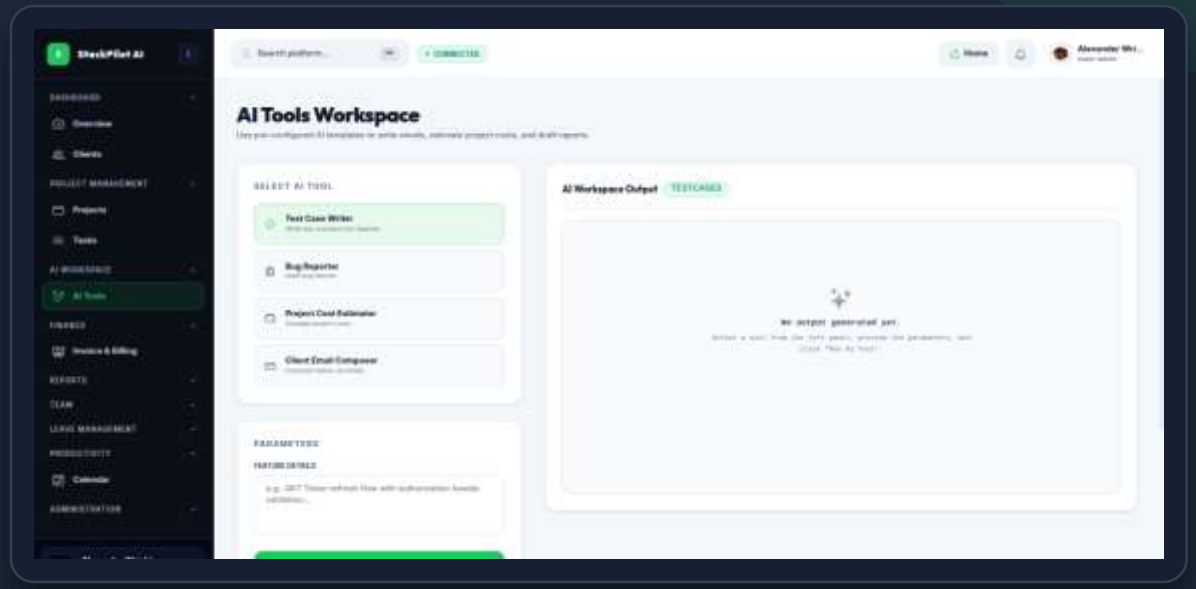

- 7-Column Workflow spans Backlog through Done for full lifecycle visibility
- Advanced Filtering by project, status, priority, and sprint
- Rich Task Detail modals capture ownership, effort, and due dates

AI WORKSPACE

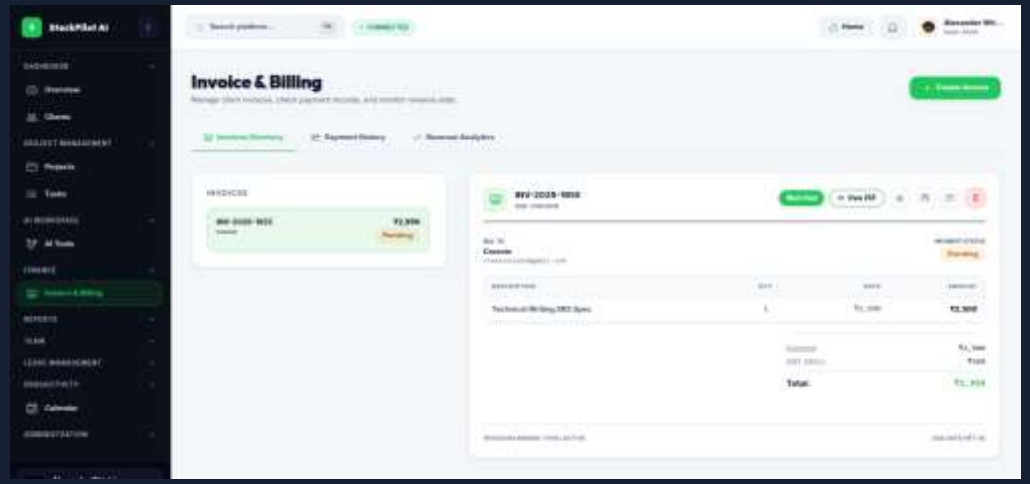

AI Studio & Automation

- Test Case Generator drafts QA scenarios directly from feature specs
- Bug Reporter automates structured, reproducible defect reports
- Requirements Engineering tools turn feature briefs into technical specs

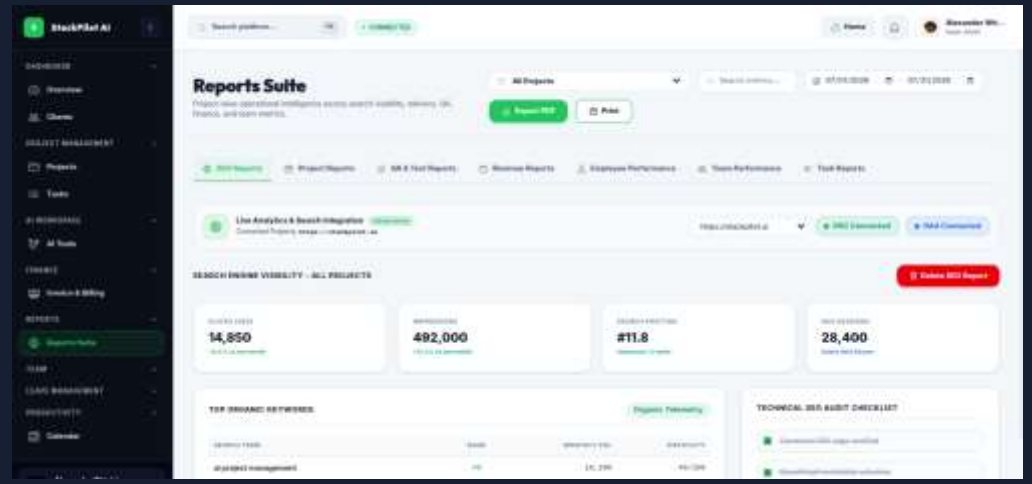

FINANCE & INSIGHTS

Operations & Analytics

Invoice & Billing Hub

Itemized invoicing with automated tax math and live payment status tracking.

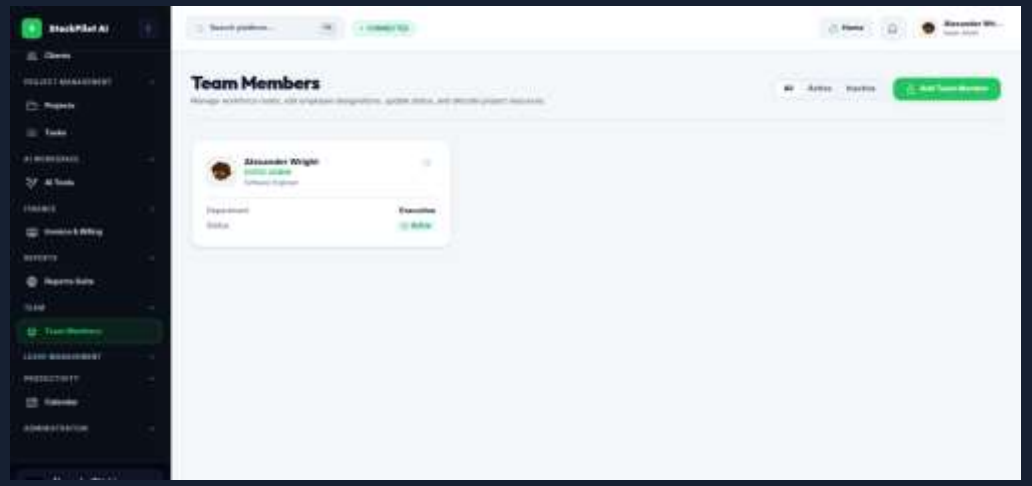

Reports Suite

SEO telemetry, QA records, and financial health in one analytics workspace.

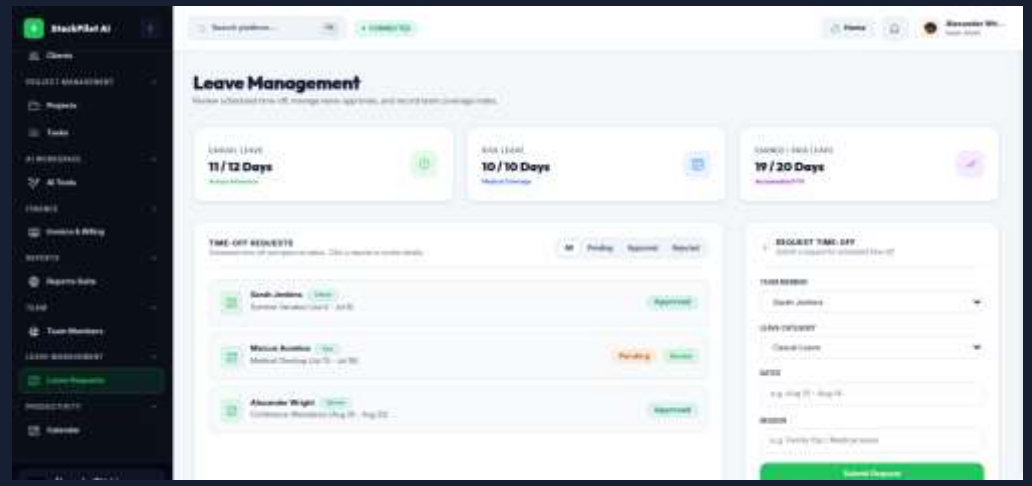

PEOPLE OPS

Workforce Management

Team Roster

Manage employee profiles, departments, and active status across the org.

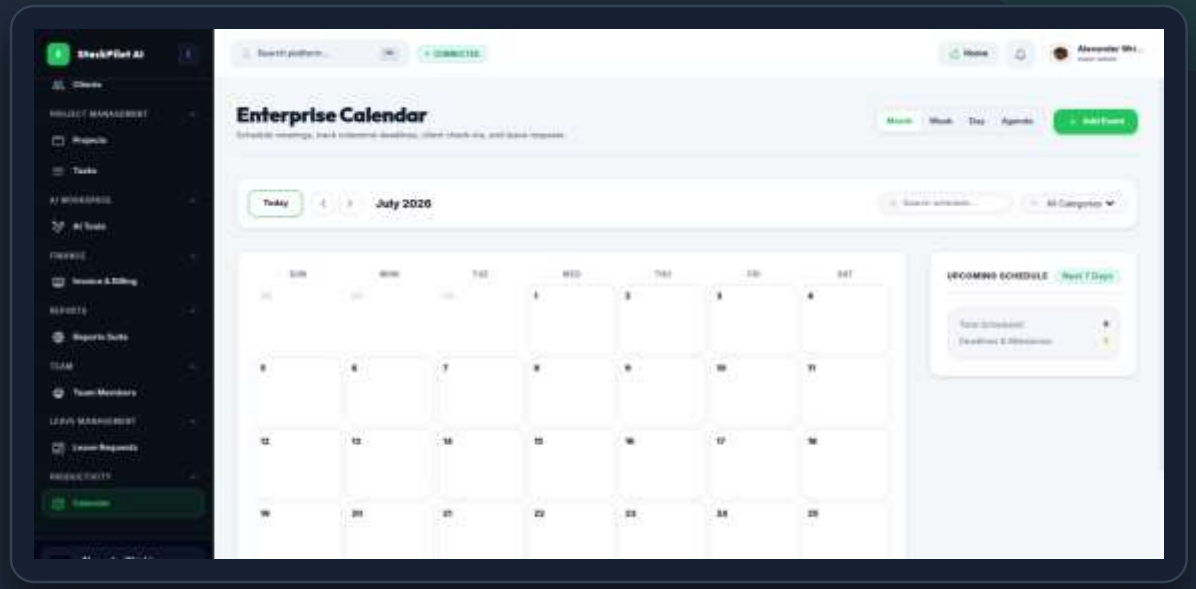

Leave Approvals

Multi-stage sign-off with sick and casual leave allowances built in.

SCHEDULING

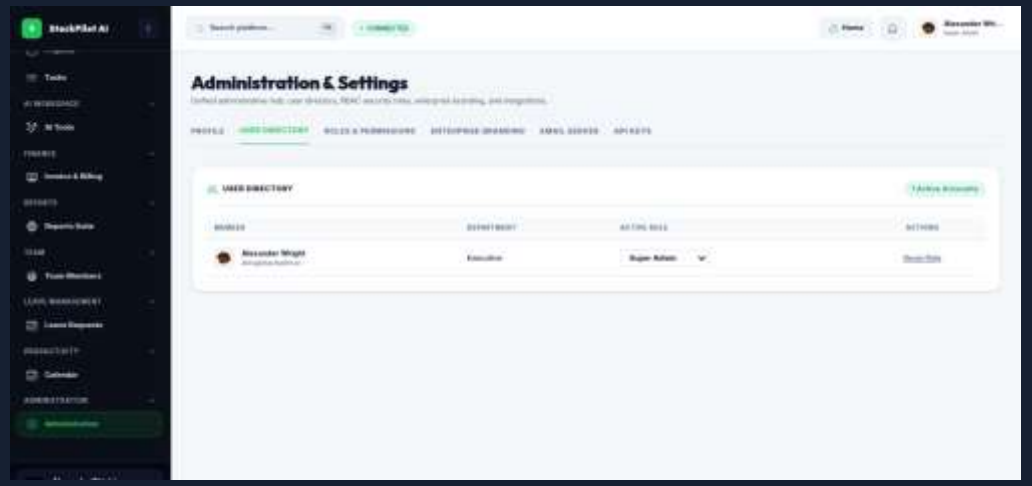

Enterprise Calendar

- Unified Scheduling across meetings, deadlines, and client check-ins
- Leave Integration surfaces approved time-off directly on the calendar
- Upcoming Deadlines panel keeps milestones and tasks front of mind

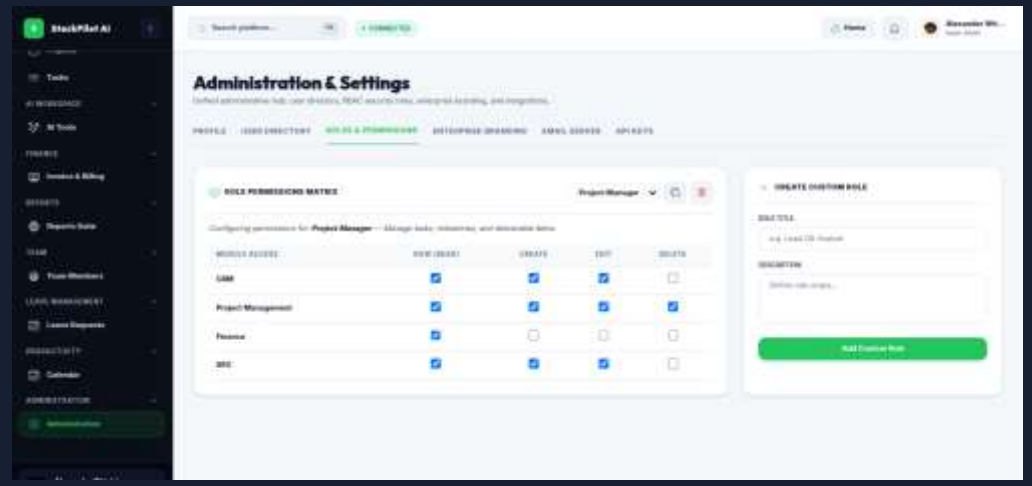

ADMINISTRATION

Identity & Access Control

User Directory

Manage accounts, active roles, and credential resets from one screen.

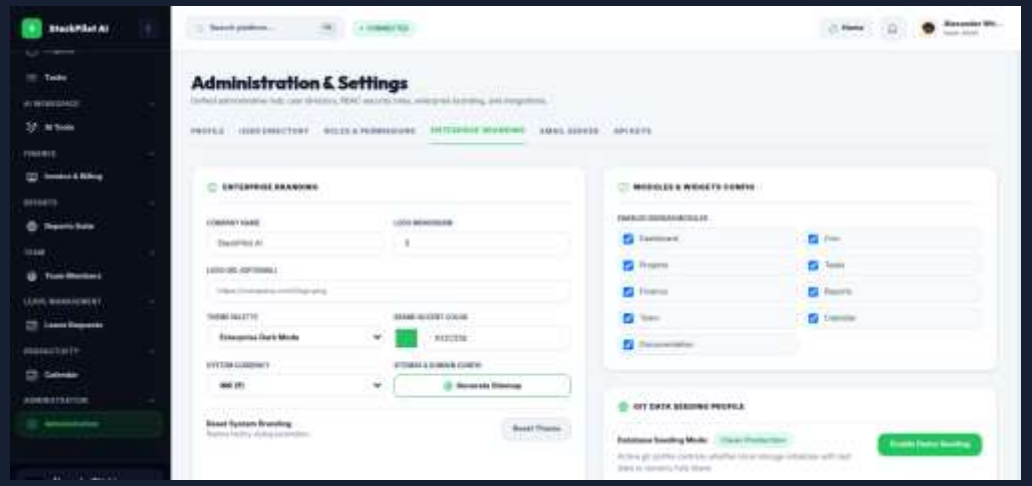

Custom RBAC Matrix

Granular View / Create / Edit / Delete permissions, defined per module.

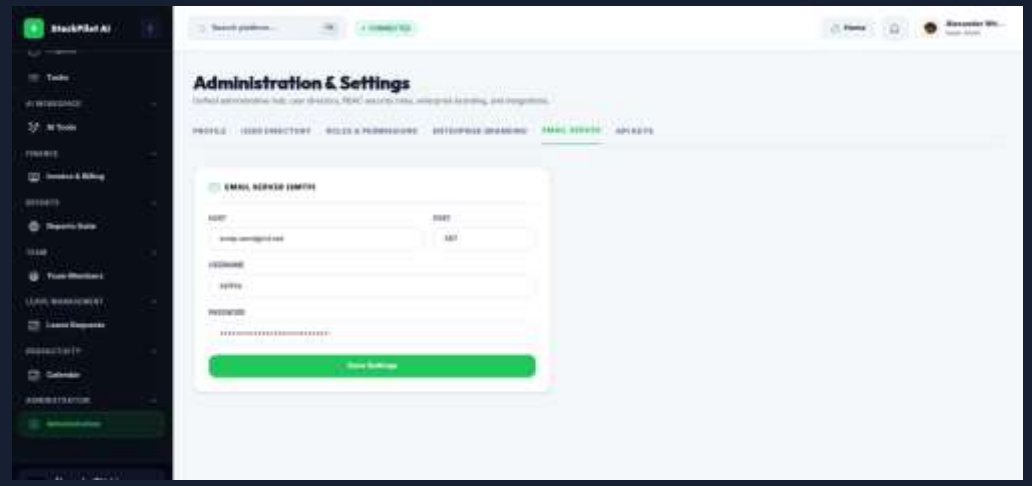

PLATFORM SETTINGS

System Configuration

Enterprise Branding

White-label theming with custom logos, colors, and brand palettes.

Email & SMTP Integrations

Reliable delivery routing through SendGrid and AWS SES.

Ready for Deployment

StackPilot AI v1.0.6 is production-ready, fully QA audited, and built on a bimodal architecture.

PRODUCTION-READY

QA AUDITED
